PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of experience specializing in **Angular front-end development**, delivering enterprise web and mobile applications. Demonstrates adaptability by extending expertise to **React.js** and **Spring Boot (Java)**, contributing to full-stack features with REST APIs and relational databases. Experienced across **GRC, Healthcare, Insurance, and Learning & Event Management**, with notable contributions to a mission-critical **Underwater Ranges solution for the Indian Navy**.

TECHNICAL SKILLS

- **Frontend:** Angular(V15--V21), TypeScript, React JS, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, RxJS, D3.js, Figma, Responsive Web Design, Component-Based Architecture, Reusable Components, Atomic Design, BEM Patterns.
- **Backend:** Java, Spring Boot, REST API Development & Integration, API Troubleshooting & Debugging.
- **Database:** PostgreSQL, MySQL
- **Version Control:** Git, GitHub, GitLab, SVN
- **Cloud & Tools:**, Postman, AWS (EC2, S3, Lambda, API Gateway, Route 53)
- **Development Practices:** Agile/Scrum, SDLC, Jira, Feature Planning, Requirement Analysis, Client & Stakeholder Collaboration**.**
- **Quality & Engineering:** Performance Optimization, Cross-Browser Compatibility, Accessibility (Level Access, Lighthouse), Unit Testing, Test Case Verification, Code Reviews, Debugging.

PROFESSIONAL EXPERIENCE

Xcubated Business Solutions Pvt.Ltd | kerala, India Sep 2025 – Present

Senior Software Engineer

XageCare - Healthcare Compliance & Care Management Platform

Healthcare platform supporting the day-to-day operations and care-management workflows of healthcare agencies.

- Delivered end-to-end features across web and mobile applications, working across React frontend, Spring Boot APIs/business logic, and PostgreSQL database changes.
- Engineered application workflows and backend services, API integrations, business logic, and database functionality across the application stack.
- Handled PostgreSQL schema/data changes, SQL queries, API troubleshooting, and frontend–backend integration, resolving technical issues throughout feature implementation.

Learning & Event Management

Digital learning and credential platform that enables students and institutions to manage learning activities, achievements, and verifiable credentials, with support for educational events and programs.

- Interacted directly with clients and stakeholders to understand requirements, plan features, refine designs, manage scope, and drive frontend delivery.
- Led end-to-end frontend feature delivery, from planning and UI design through implementation, testing, and release across desktop and mobile views.
- Designed Angular features and reusable components for complex workflows

Insurance Management Platform

*Large-scale insurance application serving 1,000+ users, built using AngularJS, Java, Spring Boot**,** PostgreSQL, Oracle, and Jenkins to support core insurance and business operations*

- Worked as part of the delivery team to develop and enhance AngularJS frontend features, including business workflows, reusable components, forms, validations, and REST API integrations.
- Played a key role in modernization of the live application by migrating critical and high-risk modules from AngularJS to Angular 18, maintaining functional continuity and compatibility.
- Supported production application maintenance through UI enhancements, troubleshooting, testing, and defect resolution, collaborating with backend teams on integration issues.

Beinex Consultancy Pvt.Ltd | kerala, India Sep 2023 - Jun 2025

Software Engineer

Governance, Risk & Compliance (GRC) – Aurex.ai Platform

Enterprise GRC platform supporting organizations in managing governance, risk, compliance, and related business processes.

- Engaged with UI/UX and core Angular teams to design and develop enterprise Angular interfaces from Figma designs, applying Atomic Design, BEM, and scalable SCSS architecture to build reusable UI components.
- Created interactive data visualizations using D3.js and custom Angular directives, building reusable components for complex, data-driven interfaces.
- Managed frontend feature delivery across Agile sprints and multiple environments, including API integration, code reviews, technical documentation, debugging, and production issue resolution.

Nest Digital Pvt Ltd | kerala, India Aug 2022 - Aug 2023

Associate Software Engineer

Internal Application Development

- Contributed to frontend and backend feature development using Angular and Java/Spring Boot, implementing UI workflows, REST APIs, backend services, and database-driven functionality.
- Developed reusable Angular components from Figma designs and contributed to Spring Boot services, API integration, and backend debugging.
- Participated in Agile feature planning, implementation, testing, and API validation using Postman, resolving frontend–backend integration issues.

Mobilexion Technologies Pvt.Ltd | kerala, India Jan 2022 - Mar 2022

Intern

Underwater Ranges – Indian Navy, Goa

- Selected through campus recruitment for an internship and worked onsite at the Indian Navy Naval Base, Goa, contributing to UI implementation and application module work using LabVIEW, including testing and debugging.
- Supported hardware implementation and system integration in collaboration with the L&T engineering team, gaining hands-on experience across software and hardware components.

CERTIFICATIONS

OWASP Top 10: Protecting Against Threats and Vulnerabilities Oct 2025
Udemy

EDUCATION

Master of Computer Applications (MCA) 2020 – 2022
Rajagiri College of Social Sciences, Kalamassery

Bachelor of Computer Applications (BCA) 2017 – 2020
Marian College Kuttikanam (Autonomous)

INTERESTS

Singing, Music Conserts, Exploring new tehnologies, Travelling

LANGUAGES

English, Malayalam
